5. **Business Development & Tourism**
6. **Planning for a Changing Climate**
7. **Access to Nature and the Outdoor Environment**

III. Workshop 3: Solutions and Choices (***Date TBD***)

How is this plan different?

Traditional Comprehensive Plan

- Structured after Pennsylvania Municipalities Planning Code (PaMPC) requirements
- Not necessarily an embodiment of the issues that matter most to residents
- As a result, document is commonly underutilized

Implementable Comprehensive Plan

- Seeks to identify solutions to local and regional problems through a community-based planning process
- Structured after **key issues** identified during planning process that matter most to residents
- PaMPC requirements are backfilled

For Tonight...

Goal: Take a closer look at the final three key topic areas, keeping in mind the following two big picture questions...

Where are we? Where do we want to go?

Activities:

- Visit the three topic-based stations and provide responses to the guiding questions at the center of the table (or other comments!)
- Each station also has a visual display to provide some relevant context for each topic
- Facilitators will be positioned at each station for guidance

Let's stay in touch!

Scan the QR Code to stay tuned on progress and upcoming events.

Virtual Workshop will be open tomorrow AM on project Website
